

# Advisor OMS®

Straight-through processing for equity and ETF trades

Advisor Rebalancing allows for straight-through processing of equity and ETF trades directly from the Advisor Rebalancing application using FIX connectivity. You can further streamline your trading workflows by routing and tracking trades from creation through settlement while benefiting from the full functionality of Advisor Rebalancing.

The screenshot shows the Advisor Rebalancing OMS interface. At the top, it displays 'Advisor Rebalancing' and 'Current Trade Date: 2/1/2012'. Below this is a navigation menu with options like 'Home', 'Rebalance & Trade', 'Reports', 'Accounts', 'Models', 'Securities', 'Upload', and 'Setup'. The main area is titled 'Advisor OMS' and contains a table of trades. The table has the following columns: Status, Broker, Ticker, Account Number, Action, Order Qty, Order Type, Order ID, Fill Qty, Average Price, and Allocation Status. The table shows a total of 11 records, with a 'Totals' row and several rows for individual trades. A blue callout box is overlaid on the bottom right of the screenshot, containing the text: 'Select to send your ETF and equity trades for straight-through processing – directly from the trading workflow of the rebalancing system'.

Status	Broker	Ticker	Account Number	Action	Order Qty	Order Type	Order ID	Fill Qty	Average Price	Allocation Status
Totals					16,517			1137		
New	Schwab				380			0
